Technology Deployment Services

TAC Worldwide
Think Agile Workforce.™

What do you do for IT infrastructure support when you're moving offices, renovating existing space, opening locations, or installing new systems and software? These complex problems have a simple solution. Contact TAC Worldwide Technology Deployment Services (TDS). We are expert in helping you with technology roll-outs, asset disposition and discoveries, end-of-lease refresh needs, front and back office upgrades and, much more.

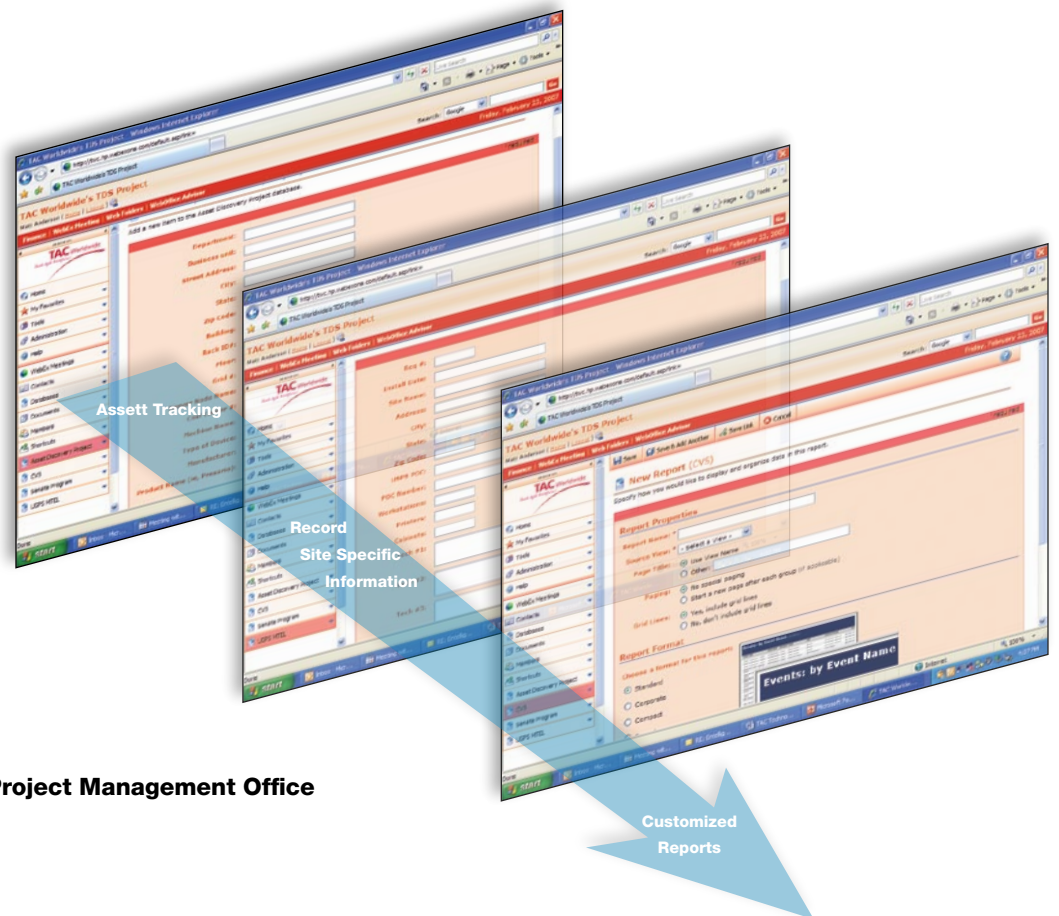

Realizing not only the importance but the variable nature of this need, the IT and engineering staffing specialists of TAC Worldwide have developed a **TDS** practice to serve a wide array of companies – and to satisfy the national growing demand. This flexible IT services organization provides the

expertise and talent to manage the complexities of large scale, distributed technology support and IT deployments. TDS also offers customized programs through its **Project Management Office (PMO)**, a web-based tool set for project communication and tracking.

TDS can complement a client's project efforts, or take control of a specific project with asset tracking, real-time reporting, and defined escalation procedures. The PMO can also be used by project managers to hold Webex® meetings with install teams. Team project reports can then be exported to project managers as well as end-users.

The importance of deploying technology correctly can never be underestimated.

Truly agile businesses trust this activity to IT professionals who perform this task daily while they remain focused on strategic execution.

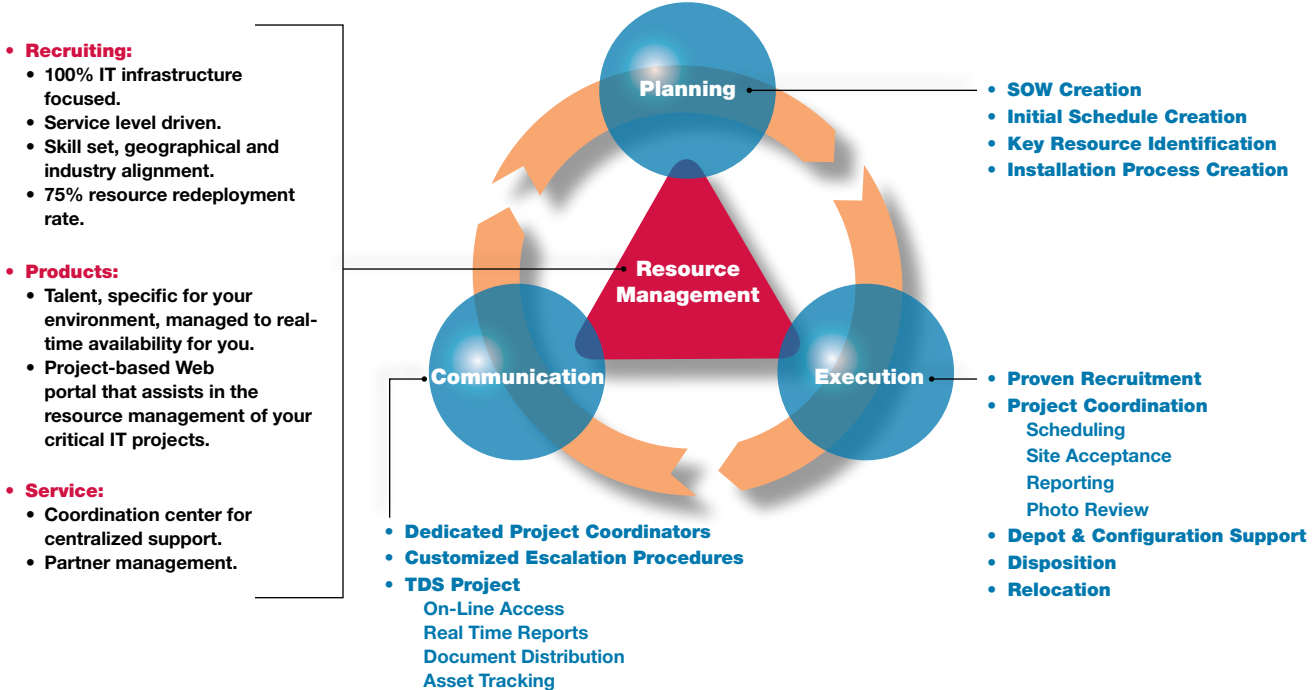

Project Management Office

Customized Reports

How we do what we do.

TDS manages all IT support interactions based upon IT service management standards and best practices.

TDS is your best-of-breed provider of technology infrastructure support implementations. Deployed on thousands of assignments a year – utilizing an account-focused business model, we have achieved consistently superior customer satisfaction ratings. Count on us for the breadth of services, seamless execution, and the pricing flexibility you need.
